

May, 2015 – *for immediate release*

As a sensor and instrumentation manufacturer with a 15 year history in electronic nose technology, Sensigent is proud to sponsor ISOEN 2015. Our [Cyranose® 320](#) product is the world's first handheld electronic nose and serves diverse markets from industrial quality to medical research. Our line of [eNose® sensor](#) products for OEMs serve the food and beverage industries worldwide. These products are powered our proprietary NoseChip™ nanocomposite sensor arrays, analysis algorithms and software to provide an accurate and reliable measurement capability for many important sensing applications
